

To All Employees:

We are committed to your well-being and safety at the workplace. However, in the event of a work-related injury, our goal is to help you recover and return to useful employment as soon as medically appropriate.

In order to do so, we use the CA Medical Provider Network (MPN) as our network of preferred medical providers. The MPN is a workers' compensation provider network built around occupational care providers who collaborate with you, your employer, and CNA.

The MPN is delivered through Coventry's network of medical providers and facilities. Coventry is a nationally recognized company specializing in occupational health, disability management and medical cost management.

The MPN includes occupational health clinics and doctors who will provide you with the medical treatment you need. Your doctor will also cooperate with all involved parties to safely manage your return to work.

Under the MPN program, you will be provided with:

- a primary care physician
- other occupational health services and specialists
- emergency healthcare service
- medical care if you are working or traveling outside of the geographic services area.

This network has been built to provide you with timely, comprehensive medical treatment. It offers easy access to quality medical care, enabling you to return to a healthy and productive life after a work-related injury.

The CA MPN Employee Handbook will provide you with the information you need to help you through your work-related injury or illness.
