

Private Equity

Custom-Built for the Pace and Complexity of Private Equity

In private equity, deals move fast. Brokers need a reliable carrier that understands the industry and delivers for their clients with speed and precision.

CNA's Private Equity practice is built to meet that demand. We offer coordinated underwriting, claims and risk control services led by our integrated team of specialists. We're committed to helping brokers deliver lasting value to their portfolio companies, and we have the financial strength and stability to grow right along with them.

Our Broad and Flexible Underwriting Appetite

We start by insuring a private equity firm's general partnership liability, but our appetite extends to its portfolio of companies across a range of industries. With a capacity for both guaranteed cost and alternative program structures, we align with trusted brokers to deliver flexible, responsive coverage for clients.

Structured for Your Success

CNA's Risk Control, Underwriting and Claims services are built on a framework of innovative technology and an integrated team structure to provide exceptionally smooth service from submission to renewal. We combine insurance expertise with deep knowledge across the industries we serve, supported by local underwriters empowered to make decisions at the point of sale. This means reduced turnaround time and more competitive quoting.

Technology-Enabled Global Reach, Local Acumen

- Real-time global placement through our CNA ComPass™ platform
- Local compliance support in 200+ countries via 226 strategic partners enhances delivery for international portfolios
- Multinational underwriting capabilities based in the U.S., Canada and Europe
