

Risk Control

Industrial Hygiene Services

Industrial Hygiene Consultation Services

CNA's Industrial Hygiene (IH) Services are designed to assist our policyholders in recognizing, evaluating and controlling occupational health exposures. Our IH team serves as a resource for program development and provides effective solutions that address occupational health risks.

Service Offerings

CNA Risk Control offers specialized and creative solutions that help policyholders reduce their occupational health exposure risks. All CNA industrial hygiene sampling plans and reports are reviewed and approved by a Certified Industrial Hygienist (CIH).

CNA's Industrial Hygiene offerings include:

- Occupational airborne exposure monitoring
- Occupational noise exposure monitoring
- Heat and cold exposure assessments
- Indoor air quality assessments
- Ventilation assessments
- Collaborative consultation to develop effective control solutions

Evaluation Surveys

CNA's Industrial Hygiene evaluation surveys are designed for exposure determinations and cannot be used to provide ongoing compliance sampling for noise or other workplace exposures. Please discuss ongoing compliance needs with CNA Risk Control for assistance in identifying other service options.

Credentialed Professionalism

Certified Industrial Hygienist

Granted by the American Board of Industrial Hygiene, the Certified Industrial Hygienist designation is recognized as the standard for practicing industrial hygienists – professionals who have met the minimum requirements for education and experience, and through examination, have demonstrated a minimum level of knowledge and skill in many industrial hygiene-related subject matter areas.

Additional Designations and Degrees

Key designations include Certified Safety Professional, Associate in Risk Management, Recognized Risk Engineer, and BS and MS Engineering degrees.
