

An intelligent policy designed to meet evolving needs.

TECHNOLOGY

Rely on the simplicity and customization of CNA Paramount®.

To help ensure technology firms receive the customized property, crime and general liability coverages they need to meet the demands of their businesses, technology companies look to CNA Paramount® for a package policy that is easy to understand. Whether their concerns are privacy, cloud computing or other emerging risks, CNA identifies trends and leverages its experience to develop a contemporary, integrated and customizable package policy designed for the unique characteristics of a technology company.

The coverages you need most.

CNA Paramount® provides technology companies with a range of essential coverages, as well as industry-leading risk control programs and support. Property and general liability coverage highlights for eligible and qualified insureds include:

Electronic vandalism

This policy provision provides coverage for the costs to replace or restore direct physical loss or damage to electronic data as a result of a denial-of-service attack, electronic infections or network impairment caused by vandals anywhere in the world.

Electronic Data Processing (EDP) and Restoration of Media

Computers, servers and other EDP equipment, as well as restoration of media, are included as part of the CNA Paramount® Personal Property limit rather than through a "basket" of additional coverages that may potentially limit recovery.

Additional Insureds

Technology firms are often required to add many additional insureds on their general liability insurance policies as a result of doing business. Private equity firms may acquire controlling interest in technology companies or technological advances in hardware, leading a company to lease its equipment instead of buying new. With CNA Paramount® Technology General Liability Extension Endorsement, categories of business partners potentially entitled to additional insured status are now more inclusive to cover broadened insured needs.

Expected or intended injury – exception for reasonable force

The popularity of and increased reliance on cloud computing and co-location data centers require technology firms to increase security. Reasonable force may be required to protect the data center. This enhancement expands general liability coverage to include bodily injury or property damage resulting from the use of reasonable force to protect persons or property.

Additional coverage from a carrier you can trust.

- Technology Errors & Omissions
- International
- Inland Marine
- Ocean Marine
- Cyber Liability
- Workers' Compensation
- Management Liability
- Umbrella & Excess

Consistent and seamless — from claim reporting to resolution.

CNA claim professionals understand that every minute a technology firm is not fully operational further reduces its ability to meet customer demands. When firms file a claim, a CNA claim professional who understands the fast pace of the technology industry and recognizes the importance of resolving claims quickly, accurately and fairly will be assigned to the matter so they can get back to business as usual.

Our UL Recognized Risk Engineers with CNA Risk Control services can help technology firms identify risk before a claim occurs.

CNA offers a wide range of programs, services and classes to assist technology firms in keeping their employees safe, profitable and fully operational.

Business income analysis

Our business interruption consultants offer a comprehensive, web-based business income and business interruption service, with additional customized services for individual companies, to help clients more accurately account for business income at risk, should a loss occur.

Product liability services

CNA Risk Control consultants can work with technology firms to quantify the impact and probability of a loss and develop methods and preventive measures that help lower their product liability risk exposures. By instituting the strategies we recommend, firms can help reduce hazards that may result in costly legal fees and lengthy litigation.

Supply Chain

If a critical supplier experiences a business interruption due to a covered cause of loss, the impact can be the same as if it were a company's own facility. Advance planning can help minimize the impact a supply chain interruption has on a company's bottom line.

Predictive Service® (aerial infrared survey)

Infrared services are not just for electrical systems. Predictive Services® inspection processes can help maximize the life of your roof. If you own a building with a large roof area or multiple buildings in the same geographic area, this service may help technology firms to better manage their roof maintenance dollars. The service includes access to Predictive Services' online analysis tools. Predictive Services offers CNA customers a preferred rate for its services.

With CNA Paramount® you can expect:

- A robust coverage solution with basic and additional coverages in a single package
- A modular form for easily tailored coverages
- A concise and forward-thinking design resulting in a cleaner and easier-to-understand policy form
- Underwriting, claim and risk control teams comprised of experienced individuals working together to provide tailored insurance solutions

Count on our stability and financial strength.

CNA is the 8th largest U.S. commercial property and casualty insurance company. With an "A" rating for financial strength from A.M. Best, we have the resources and tools to assist businesses in mitigating their risks. Additionally, we offer:

- Local underwriting authority
- A broad product portfolio with the ability to write a broad range of property and casualty risks
- Nationwide risk control services to help assess and address risk exposures
- Claim support services in all 50 states and more than 150 countries around the world

When it comes to finding a carrier with the industry knowledge and experience to better understand our customers' needs
