

Walkway Management Group, Inc.

Solutions for Hard Surface
Flooring Slip Resistance Testing,
Remediation and Products

Slip and Fall Prevention

Slips and falls can happen anywhere, any time and to anyone. Whether it's a visitor, customer or your own employee, what matters most is that your business is taking the necessary steps to develop and implement a slip and fall prevention program. CNA Risk Control has found that a critical component of these programs is addressing the slip resistance and maintenance of interior floors to reduce exposures. Whether you are in retail, real estate, healthcare, food service or any other industry, flooring surface slip resistance is a critical safety concern and you need an insurance provider that understands the challenges you face and offers the risk management solutions you need to optimize your slip and fall program.

Introducing Walkway Management Group

Step Forward With Confidence and Choose Walkway Management Group, Inc.

CNA now offers policyholders access to Walkway Management Group, Inc. (WMG), your total floor safety solution provider worldwide. Walkway Management Group is the leader in walkway testing and hazard remediation technology, services, and products that protect their clients from the dangers of a slip and fall accident. WMG's national network of safety professionals and service support team offers a comprehensive approach to walkway hazard detection, remediation, and maintenance across the United States of America. WMG associates offer products and services that meet the highest certifications and performance standards in the walkway safety industry.

Enhance Slip Resistance Programs with Walkway Management Group

- WMG is the exclusive distributor of the BOT-3000E tribometer with vast industry knowledge gained by direct rapport with BOT-3000E users, manufacturers, and industry professionals that develop walkway safety industry standards
 - Slip test services with the BOT-3000E tribometer (the only device qualified for use under ANSI A326.2 "American National Standard Test Method of Measuring Dynamic Coefficient of Friction of Hard Surface Flooring Materials")
 - Traction Enhancing Treatments with Walkway Management Group's scientifically developed and proven BOOST and BOOST+ product lines to remediate all hazardous conditions on any floor type
 - Remote and local monitoring by highly trained certified walkway safety specialists to assure your walkway is always above standard DCOF
 - Empirical and data-driven slip test reports generated through WMG's proprietary STEP app, providing superior support for any regard to potential litigation or claims
 - ISO accredited lab research and testing of floor and walkway surface items to ensure compliance with relevant standards
 - Training for professional certification including the mandated University of North Texas Walkway Safety Specialist certification (the highest certification in this industry) and BOT-3000E Training to assure the ins and out of performing a proper ANSI A326.3 slip test
 - This unique and innovative approach to walkway safety can help you prevent the high costs of slip and fall hazards. WMG's pioneering concept makes walkway safety "mainstream" providing economic, cost-effective solutions applicable to every walkway in America
-

Why Choose Walkway Management Group, Inc?

Walkway Management Group, Inc. is committed to walkway safety. They offer the tools, processes, and support you'll need to step forward with confidence. WMG's tribometer, floor treatments, lab testing and certificate training all meet the relevant ANSI, ASTM and ISO standards. All company processes are the result of 30 years of experience and thorough scientific research conducted in partnership with leading Universities in Europe and the United States. WMG's strategic research partnership with the University of North Texas, College of Engineering ensures continuous progress in the science of pedestrian safety. Strict adherence to standards and continued investment in scientific research gives you the peace of mind needed when choosing a walkway safety specialist.
