

One complete policy. One less worry.

Precision-built coverage for today's multiplied manufacturing risks.

We can show you more.®

MANUFACTURING

Rely on the simplicity and customization of CNA Paramount®.

To help ensure you get the customized property and crime coverages you need to meet the demands of your business, look to CNA Paramount®. CNA can write coverage for more than 90 percent of all manufacturing SIC codes and is the endorsed carrier for two of the nation's leading manufacturing trade associations. We've used our expertise to develop a contemporary, integrated and customizable property and crime package policy designed for the unique characteristics of manufacturers like you.

The coverages you need most.

CNA Paramount® provides manufacturers a range of essential coverages. Property coverage highlights include:

Contractual penalties

Delays in a project can lead to penalties imposed by the terms of a written contract with a customer. CNA Paramount® provides coverage for certain penalties you may incur due to a covered cause of loss.

Dependent property time element coverage (Contingent Business Interruption)

CNA Paramount® offers coverage for loss of income resulting from direct loss to properties that are operated by others whom you depend upon for your business.

Processing water

Water is critical to most manufacturing processes. Under certain circumstances, if the supply of that resource becomes inadequate because of a covered peril and you cannot operate without it, CNA Paramount® provides coverage for the reasonable and necessary costs to ship, truck or otherwise separately deliver water to your property.

Accidental marring or scratching

Molds that are scratched or damaged can create products that are less than ideal for your customers. CNA Paramount® provides coverage for the replacement of accidentally marred or scratched molds, dies, patterns and plates used in manufacturing.

Additional coverage from a carrier you can trust.

Other key coverages available from CNA include:

- Cyber Liability
- General Liability
- International
- Employment Practices Liability
- Limited Pollution Liability
- Equipment Breakdown
- Ocean Cargo

Find evidence of risk before a claim occurs with CNA Risk Control services from the only organization with UL Recognized Risk Engineers.

Sprinkler system

Proper planning can help a company maximize its fire protection dollar while minimizing its fire insurance costs. CNA can perform a technical review of new installations and existing systems to ensure that they are adequate for the building that they are designed to protect. This analysis considers current and future needs as well as nationally recognized fire protection standards.

Business income analysis

CNA's Business Interruption services offer a comprehensive Web-based business income and business interruption consultation, with additional customized services, that makes it easy to estimate the financial impact of business income lost if a claim occurs.

Supply chain

If a critical supplier experiences a business interruption due to equipment breakdown, a fire or weather, the impact can be the same as if it were your own facility. Advance planning can help minimize the impact that a supply chain interruption has on your bottom line.

Predictive Service® (aerial infrared survey)

Infrared services are not just for your electrical systems. Predictive Service's inspection process can help maximize the life of your roof. If you own a building with a large roof area or multiple buildings in the same geographic area, this service may help you better manage your roof maintenance dollars. The service includes access to Predictive Service's online analysis tools. Predictive Services offers CNA customers a preferred rate for its services.

Business continuity planning

Organizations that fail to begin regular business functions within 72 hours after a disaster occurs are at a much greater risk of going out of business than those that do. That is why every business should have a business continuity plan in place. Our Business Continuity Certified specialists in partnership with our allied vendors offer expertise that you can use to prepare the most positive course of action to take in the event of a disaster, and reduce the impact of any business interruption.

Prompt, attentive and customer-focused claim handling.

Our philosophy is simple — manage claims quickly, fairly and accurately. For claim services that exceed your expectations, look no further than CNA. We strive to be the industry's best claim organization and, according to our clients, we are on the right track. Our customer survey results reflect our clients' satisfaction with our claim services. Our claim professionals are here to support you wherever and whenever you need us — across the country and around the clock.

With CNA Paramount® you can expect:

- A robust coverage solution with basic and additional coverages in a single package
- A concise and forward-thinking design for a cleaner and easier-to-understand policy
- Underwriting, claim and risk control teams working together with your independent agent to provide tailored insurance solutions for your business

Count on our stability and financial strength.

With an "A" rating from A.M. Best, CNA has the financial strength to be there when you need us. Additionally, we offer:

- A broad product portfolio to cover your property, casualty and professional risks
- Risk control consultative services and online tools to help assess and address risk exposures
- Local claim offices to quickly deploy specialists who take pride in helping our policyholders get their businesses back up and running
- Global representation to serve you in more than 150 countries around the world
