

CNA at a Glance

Q1 2022 Financial Highlights

	Q1 2022	Q1 2021
Core Income	\$316m	\$263m
P&C Net Written Premium	\$2.02b	\$1.94b
P&C Underlying Combined Ratio	91.4%	91.9%
Combined Ratio	91.9%	98.1%
Net Investment Income, Pretax	\$448m	\$504m

- Core income up 20% to \$316m versus \$263m in the prior year quarter.
- P&C combined ratio was 91.9%, the lowest in over five years, including 1.0 point of catastrophe loss impact.
- P&C underlying combined ratio was 91.4%, 0.5 points favorable to the prior year quarter driven by improvement in the expense ratio.
- P&C gross written premiums excluding third-party captives grew 8% and net written premiums increased 4%.
- Book value per share excluding accumulated other comprehensive income of \$44.67, a 2% increase from year-end 2021 after adjusting for \$2.40 of dividends per share; book value per share of \$39.87 was also impacted by a decrease in AOCI reflecting the effect of higher interest rates on fixed income net unrealized gains and losses.

“We are off to a good start in 2022 with a 20% increase in core income resulting from improved underlying P&C underwriting income and lower catastrophe losses. Our combined ratio of 91.9% was the lowest quarterly combined ratio in over five years. Gross written premium growth ex captives was 8% in the quarter. Earned rate increase of 9% remains comfortably above loss cost trends and a positive gap should persist through year-end as written rate increases, which were 7% in the quarter, are moderating at a measured pace and remain robust where needed most. With significant rate achievement over the last several years and improved terms and conditions, we remain optimistic about the market conditions and our growth opportunities for the remainder of 2022.”

Dino E. Robusto
Chairman and Chief Executive Officer
