

One complete policy. One less worry. Precision-built coverage for today's manufacturing risks.

MANUFACTURING

Rely on the simplicity and customization of CNA Paramount®.

For the customized property, crime and general liability coverages they need to meet the demands of businesses, manufacturers look to CNA Paramount® for a package policy that's easy to understand. CNA has experience writing for a broad range of industry codes and is the endorsed carrier for two of the nation's leading manufacturing trade associations. We've used our experience to develop a contemporary, integrated and customizable package policy designed for the unique characteristics of commercial manufacturers.

Coverages that manufacturers need most.

CNA Paramount® provides manufacturers with a range of essential coverages. Property and general liability coverage highlights for eligible and qualified insureds include:

Contractual penalties

Delays in a project can lead to penalties imposed by the terms of a written contract with a customer. CNA Paramount® provides coverage for certain penalties the insured incurs due to a covered cause of loss.

Dependent property time element coverage (Contingent Business Interruption)

CNA Paramount® offers coverage for loss of income resulting from direct loss to properties not owned or operated by the insured, but that are operated by others upon whom the insured depends on for business.

Accidental marring or scratching of molds, dyes, patterns or plates

Provides coverage for marring and scratching of those types of properties — their own and others in their care, custody, or control. Unique and expensive manufacturing property in the care, custody or control of the insured, if damaged, can be extremely costly. CNA Paramount® can provide coverage for marring and scratching of these types of properties.

Estates, legal representatives and spouses

For middle market, privately-held manufacturing companies, this is a very useful general liability enhancement. The estates, heirs, legal representatives and spouses of any natural person insured are also considered insureds for claims arising out of their status as such.

Product Recall Expense Coverage

Few events can damage brand integrity or challenge long-term success more than a product recall. CNA offers an extensive Product Recall Expense Coverage endorsement with first and third party options, to help manage the financial impact that may ensue.

Crisis Management

CNA now offers crisis management coverage designed to help manufacturers manage the negative media repercussions that arise from third party allegations that a product contains a defect, deficiency or inadequacy.

Additional coverage from a carrier you can trust.

Other key coverages available from CNA include:

- Cyber Liability
- International Exposures
- Manufacturer's Errors & Omissions
- Employment Practices Liability
- Limited Pollution Liability
- Equipment Breakdown
- Ocean Cargo

Find evidence of risk before a claim occurs with CNA Risk Control services — the only organization with UL Recognized Risk Engineers.

CNA offers a wide range of programs, services, and classes to assist manufacturing companies in keeping their employees safe, profitable and fully operational.

Business continuity planning

Organizations that fail to begin regular business functions within 72 hours after a disaster occurs are at a greater risk of going out of business than those that do. That is why every business should develop and implement a business continuity plan. Our Business Continuity Certified specialists, in partnership with our allied vendors, offer experience that organizations can use to prepare the most positive course of action to pursue in the event of a disaster, and reduce the impact of any business interruption.

Supply chain

If a critical supplier experiences a business interruption due to equipment breakdown, a fire or weather, the impact can be the same as if it were a company's own facility. Advance planning can help minimize the impact that a supply chain interruption has on a company's bottom line.

Reducing catastrophes and employee injuries

Reducing catastrophes and employee injuries goes beyond simply making sure a floor isn't slippery. Workspaces should be evaluated from a process management standpoint. By observing five practices, manufacturers can boost employee productivity and product quality. Equally important, firms can also reduce employee injuries and exposure for fires and other catastrophes that can shut them down — permanently.

Prompt, attentive and customer-focused claim management.

Our philosophy is simple — manage claims quickly, fairly and accurately. For claim services that exceed the expectations of manufacturers, look no further than CNA. We strive to be the industry's best claim organization and, according to our clients, we're on the right track. Our customer survey results reflect our clients' satisfaction with our claim service. Our claim professionals are here to support manufacturers—across the country and around the clock.

With CNA Paramount® you can expect:

- A robust coverage solution with basic and additional coverages in a single package
- A modular form for easily tailored coverages
- A concise and forward-thinking design resulting in a cleaner and easier-to-understand policy form
- Underwriting, claim and risk control teams comprised of experienced individuals working together to provide tailored insurance solutions

Count on our stability and financial strength.

With an "A" rating for financial strength from A.M. Best, CNA has the resources and tools to assist businesses in mitigating their risks. Additionally, we offer:

- Local underwriting authority
- A broad product portfolio with the ability to write full property and casualty risks
- Nationwide risk control services to help assess and address risk exposures
- Claim support services in all 50 states and more than 150 countries around the world

When it comes to finding a carrier with the industry knowledge and experience to better understand our customers' needs
